DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 9 October 2003.

Allowable Subject Matter

2. Claims 1-25 are allowed.
3. The following is a statement of reasons for allowance:

The best prior art of record fails to disclose the specific arrangement of the expansion card that comprises a frame and antenna structure (and their positional relationships, i.e., how the second end of the rod structure of the antenna is adapted to be placed movably inside the frame) (the method of which is recited in claim 10), along with the limitation of the antenna structure comprising a contact pin for electrically connecting the antenna structure to a circuit board when the contact pin makes electrical contact with a first contact spring on the circuit board as recited in independent claims 1 and 11. In addition, the best prior art of record fails to teach the use of a contact pin and contact spring together for establishing electrical connection and, more specifically, the best prior art of record fails to teach the arrangement of the electrical connections to specific positions of the position lever and lever guides of the locking means of the present invention as recited in independent claims 15 and 24. Therefore, the best prior art of record, Aldous and Phillips, fails to teach the limitations of the independent claims 1, 10, 11, 15, and 24 and their dependent claims.

Hence the best prior art of record fails to teach the invention as set forth in claims 1-25 and the examiner can find no teaching of the specific arrangement of the components of the expansion card, nor reasons within the cited prior art or on her own

to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response of paper number filed 9 October 2003.
